Smart contract analyzer: one file, seven pattern checks

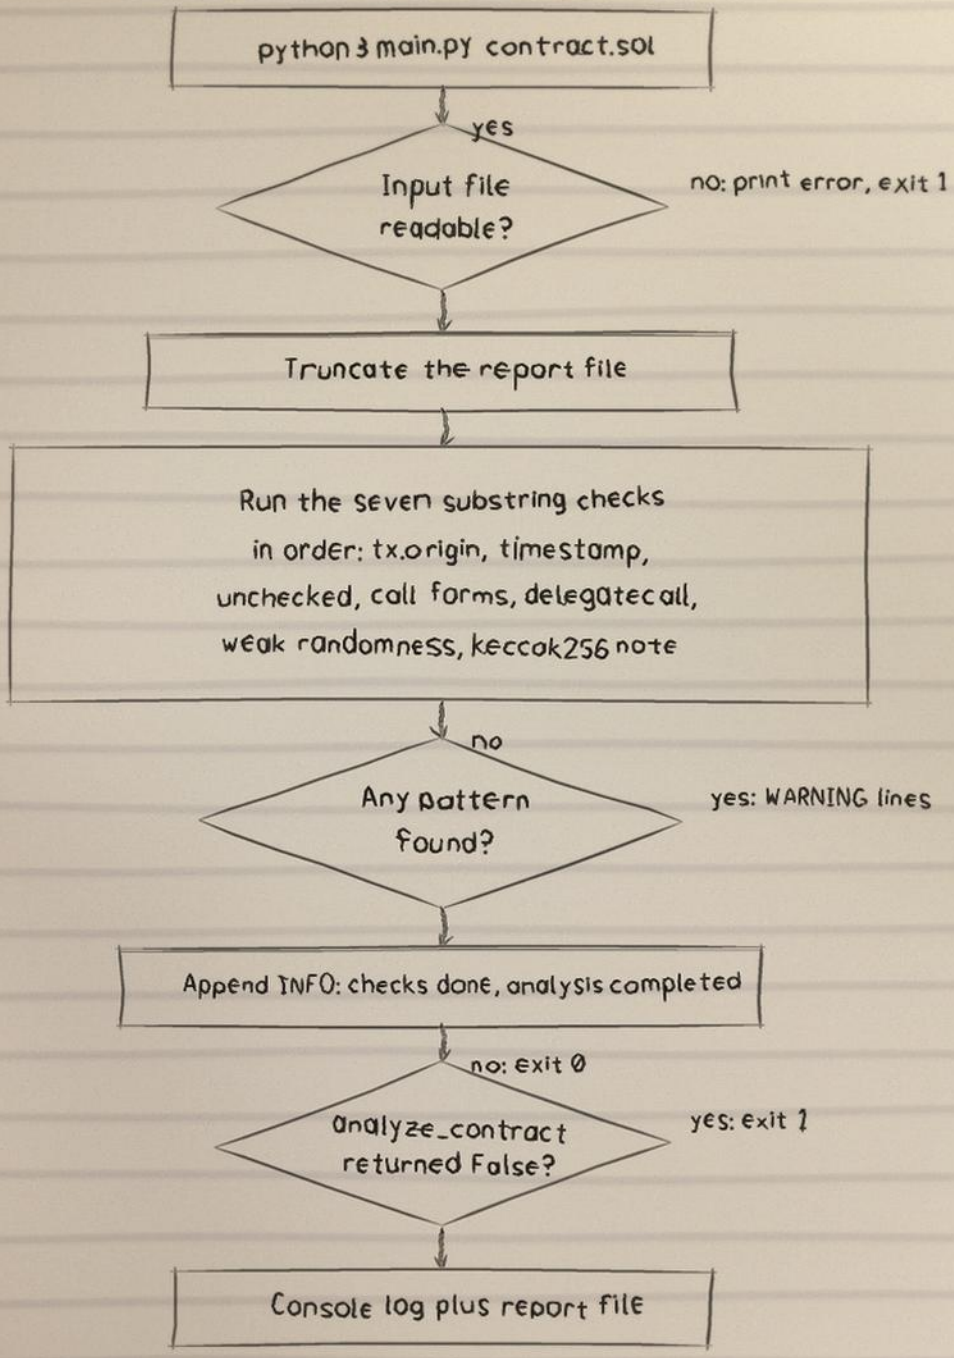

Standard library only: argparse, logging, sys. No parser, no control flow graph, no bytecode work.

A clean report means only this: none of the seven patterns was found in the text.

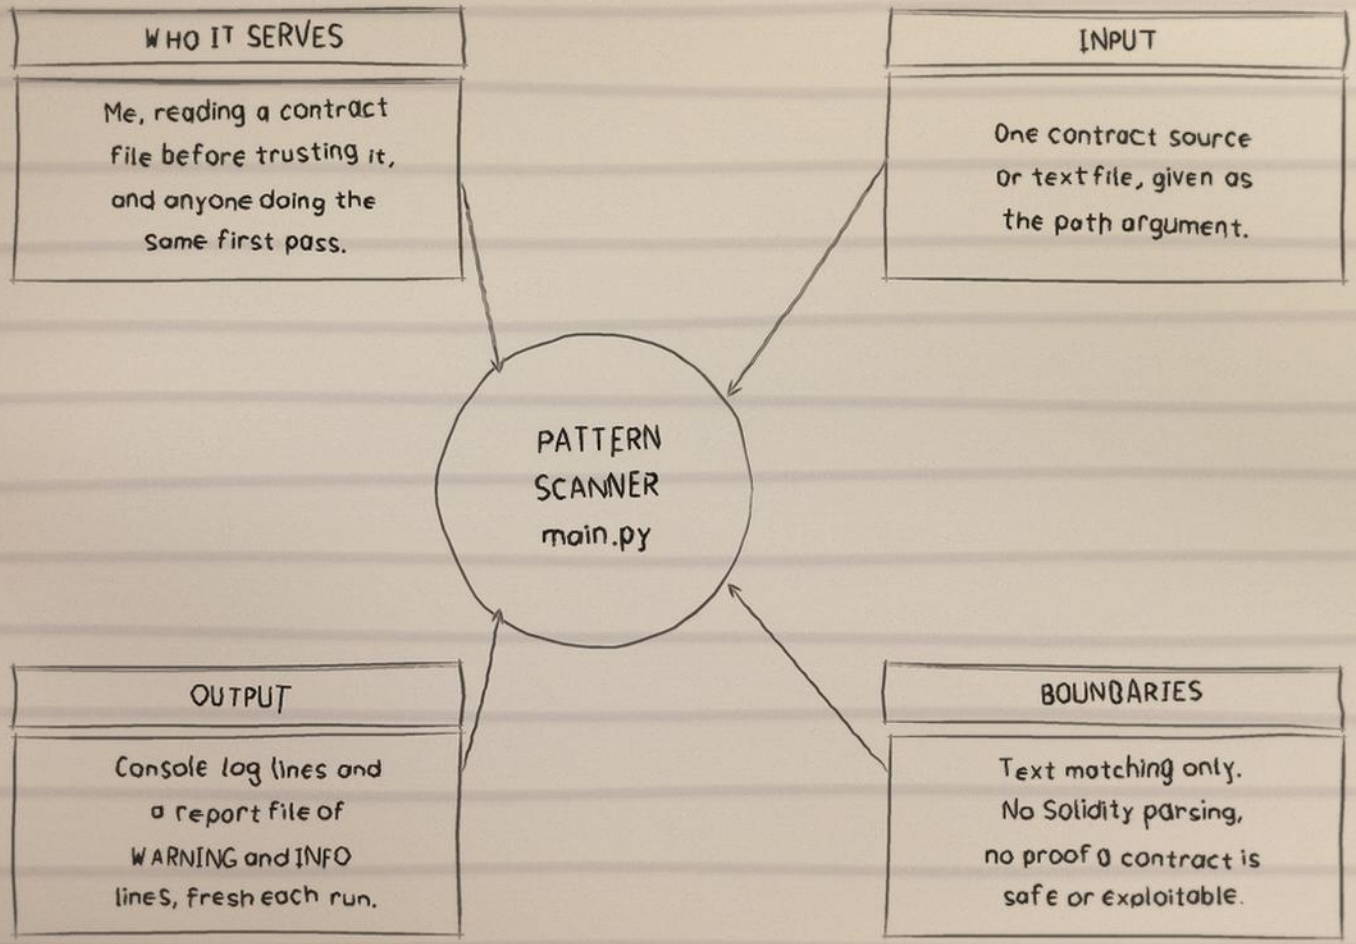

file tag, signed GK

One scan, followed step by step

Verbose flag -v only changes the log level.
Nothing in this flow runs the contract.

Product map: a first look at a contract file

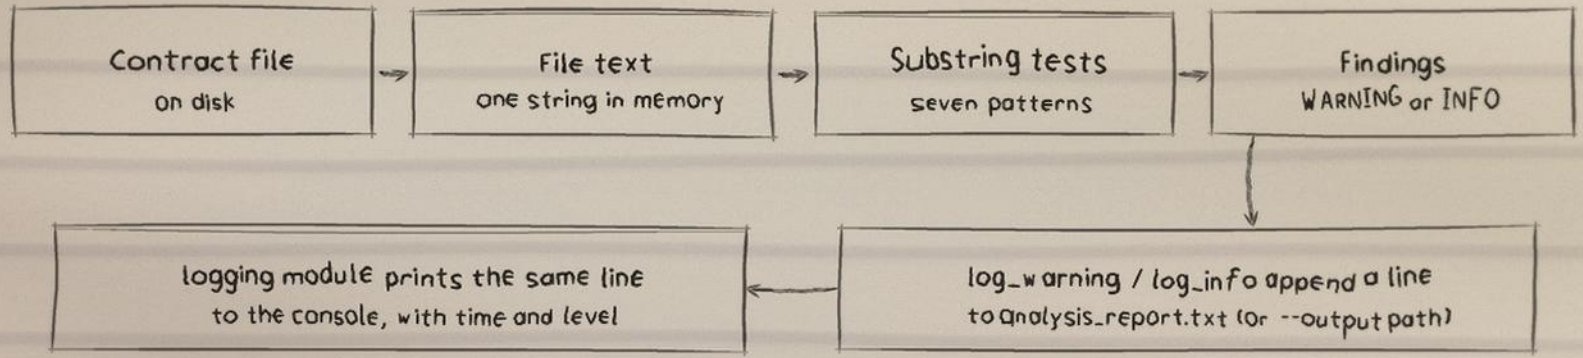

checked and signed in the margin, GK

GK

Data flow: contract text in, report lines out

TOP LANE: the words of the file. BOTTOM LANE: where each finding goes.

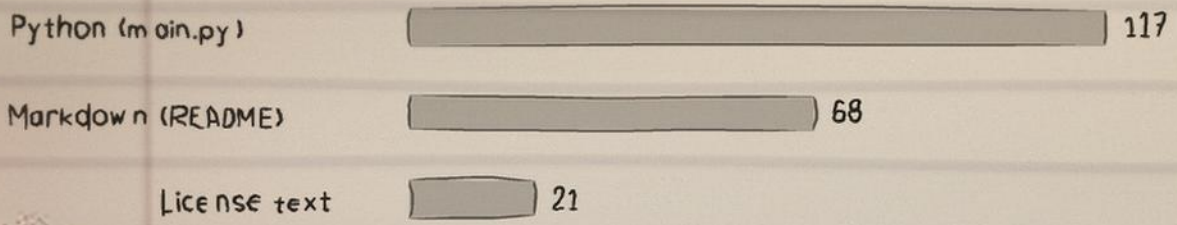

The file text is never compiled, deployed, or run. It is only searched.

sticky note, GK

Contract analyzer in numbers, counted 2026-10-30

Lines by kind, from git ls-files and a line count over each tracked text file.

The whole repo is 6 files and 8 commits. First commit 2025-06-18, last one 2026-10-30, both from git log.
Tests: no test suite ships in this repo, so no pass is claimed. A hand smoke run on 2026-10-30 did work.
Full table with the counting method for every number: VISUAL.md in this folder.

counted, drawn :3 K

Crypto Smart Contract Static Analyzer: schematic of the apparatus

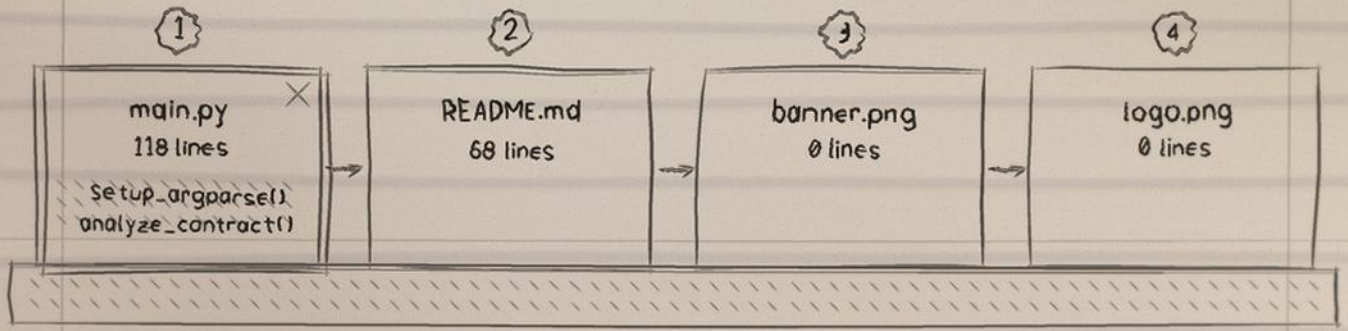

the system as a machine: parts, flow, and measurements

construction lines left in, as drawn

parts list

1. main.py
2. README.md
3. banner.png
4. logo.png

in flow order, first to last

base plate: the repo itself, sectioned

span: 5 files, 186 lines counted

turns of the crank so far: 7 commits, 2025-06-18 to 2026-10-30

measured and sketched, GK
